

Industrial Cable Gland Connectors

Precision-engineered solutions for secure cable connections in the world's toughest industrial environments

What Are Industrial Cable Glands?

Industrial cable glands are specialized devices designed to securely attach and seal electrical cables to equipment, machinery, and junction boxes. They serve multiple critical functions in industrial settings.

These essential components provide robust strain relief to prevent cable damage, offer comprehensive environmental protection against dust and moisture intrusion, and ensure proper electrical grounding for safety.

Available in premium materials including brass, stainless steel, and specialized corrosion-resistant alloys, cable glands are engineered to maintain safety and reliability even in the harshest industrial environments.

Key Features & Certifications

Superior Sealing

IP66/IP67/IP68 ratings ensure complete dustproof and waterproof protection for critical installations

Hazardous Area Ready

Explosion-proof and flameproof designs certified for use in potentially dangerous environments

Global Compliance

Meets IEC, BS EN 62444, ATEX, and IS standards for worldwide industrial applications

EMC Shielding

Advanced electromagnetic compatibility options protect sensitive electrical installations from interference

Multiple thread types and sizes available to accommodate versatile industrial requirements and cable specifications.

Applications & Accessories

Industrial Applications

Power Generation & Distribution

Oil & Gas Facilities

Pharmaceutical Manufacturing

Renewable Energy Systems

Marine & Offshore

Heavy Machinery

Complete Accessory Range

Comprehensive selection of accessories including locknuts, sealing rings, earth tags, adapters, reducers, and gland spanners. Custom solutions available for specific cable types and unique industrial requirements, ensuring enhanced cable protection, proper grounding, and superior mechanical stability.

Why Choose CabexIndia?

ISO-Certified Excellence

Global manufacturer with established presence across Europe, UK, Australia, Middle East, and Far East

Uncompromising Quality

Precision-engineered and rigorously tested products ensuring maximum durability and safety compliance

Reliable Partnership

On-time delivery and expert technical support for all your industrial and hazardous area cable gland needs

Experience the power of quality with CabexIndia — your trusted partner securing connections for the toughest environments worldwide
