

# FRESH AIR HANDLING UNIT UAE

## ABOUT US

CariCool Limited UK is a trusted provider of innovative HVAC and indoor air quality solutions, delivering reliable services across Dubai and the UAE. We offer a comprehensive range of products and services, including fresh air handling units (FAHU), ventilation systems for high-rise buildings, and specialized solutions for shisha cafés, restaurants, and commercial kitchens. Our expertise extends to smoke extraction systems, electrostatic precipitators (ESP), HVAC ductwork, and GI/PI fire-rated duct supply. We also assist clients with Dubai Municipality approvals, HVAC design documentation, and building management system integration. By incorporating advanced EC fan motor technology and modern air purification systems, we help businesses improve energy efficiency, enhance indoor air quality, and reduce operating costs. CariCool is committed to delivering dependable performance, regulatory compliance, and long-lasting HVAC solutions tailored to every project.

# FRESH AIR HANDLING UNIT UAE

Looking for a reliable Fresh Air Handling Unit (FAHU) supplier in the UAE? CariCool Limited UK provides advanced fresh air handling solutions designed to improve indoor air quality, energy efficiency, and overall HVAC performance for commercial, industrial, and residential projects. Our FAHU systems are engineered to deliver a continuous supply of clean, filtered fresh air while maintaining optimal temperature and humidity levels. Suitable for offices, hotels, hospitals, restaurants, shopping centers, and high-rise buildings, our solutions are customized to meet specific project requirements and local compliance standards. Backed by expert technical support, quality manufacturing, and innovative EC fan motor technology, CariCool Limited UK helps businesses create healthier indoor environments, reduce energy consumption, and achieve reliable long-term HVAC performance across the UAE.
